1. NAME OF THE VETERINARY MEDICINAL PRODUCT

Rearguard 6% w/v Cutaneous solution

2. STATEMENT OF ACTIVE SUBSTANCES

Contains 6% w/v cyromazine

3. PHARMACEUTICAL FORM

Cutaneous solution

4. PACKAGE SIZE

25 ml

5. TARGET SPECIES

Rabbits

6. INDICATION(S)

Prevents blowfly strike on domestic rabbits for 10 weeks
Rearguard Cutaneous solution gives 10 weeks protection against blowfly strike in domestic rabbits.

7. METHOD AND ROUTE(S) OF ADMINISTRATION

For external use only.
Shake container before use.
It should be applied before any anticipated blowfly challenge.

Directions for use:

Rearguard Cutaneous solution comes supplied ready-to-use in a bottle with built-in applicator sponge. Gently depress the sponge to break the valve before applying. Apply the product using the sponge applicator ensuring that the rabbit's fur is thoroughly wetted with the solution from the middle of the back to the tip of the tail. Special attention should be paid to the areas under the tail and between the back legs. Contents of the bottle is a single application. Do not allow the product to run off the animal. Rabbits should be treated at 8-10 week intervals under conditions of repeated blowfly challenge. Rearguard Cutaneous solution does not repel flies but it will prevent any maggots formed from developing further and damaging the animal. If the rabbit is continually attractive to flies, this may be due to an underlying disease eg. diarrhoea or incontinence, or a lack of hygiene within its housing. In such cases further advice should be sought from your veterinary surgeon.

8. WITHDRAWAL PERIOD(S)

9. SPECIAL WARNING(S), IF NECESSARY

For directions for use, contra-indications, warnings and precautions, peel back outer back label.

Contra-Indications and Warnings:

Bathing or washing the rabbit after application may result in a reduction in efficacy. Treated rabbits may show a temporary reduction in appetite in the 24-48 hours following treatment. Not to be used in pregnant and breeding females. Consult your veterinary surgeon before treatment of old, sick or debilitated rabbits. Do not apply to broken skin. Not to be used on rabbits intended for human consumption. Not to be used on rabbits less than 10 weeks of age.

Precautions:

For external use only.

Special precautions to be taken by the person administering the veterinary medicinal product to animals:

Wash hands and exposed skin after use. Wash splashes from skin and eyes immediately. Do not smoke whilst using the product.
