<td>1. Indicate in the instructions for use: ‘Dangerous for equine species, turkeys and rabbits’ 2. This feedingstuff contains an ionophore: simultaneous use with certain medicinal substances can be contraindicated’. 3. The additive shall be incorporated in compound feed in form of a premixture. 4. The preparation of narasin and nicarbazin shall not be mixed with other coccidiostats. 5. A post-market monitoring program on the resistance to bacteria and Eimeria spp. shall be planned and executed by the holder of authorisation. 6. From 28 October 2013 the p-nitroaniline content shall be ≤ 0.1 %. 7. For safety: breathing protection shall be used during handling.</td>

**Additive composition**

- **Narasin**: 80 g activity/kg
- **Nicarbazin**: 80 g/kg (Ratio 1:1)
- Vegetal or mineral oil: 10-30 g/kg
- Vermiculite: 0-20 g/kg
- Micro tracer red: 11 g/kg
- Corn cob grits or rice hulls qs 1 kg

**Active substance**

1. **Narasin**, \(\text{C}_{43}\text{H}_{72}\text{O}_{11}\)  
   CAS number: 55134-13-9
   polyether monocarboxylic acid produced by \(\text{Streptomyces aureofaciens}\) (NRRL 8092), in granular form
   Narasin A activity: ≥ 85 %

2. **Nicarbazin**, \(\text{C}_{19}\text{H}_{18}\text{N}_{6}\text{O}_{6}\)  
   CAS number: 330-95-0
   equimolecular complex of 1,3-bis(4-nitrophenoyl) urea and 4,6-dimethylpyrimidin-2-ol, in granular form
   Related impurities: p-nitroaniline: ≤ 0.3 %

**Maximum Residue Limits (MRLs) in the relevant foodstuffs of animal origin**

- **Narasin**  
  - 28 October 2020 50 μg of narasin/kg for fresh liver, muscle, kidney and skin/fat.
  - 6 000 μg of DNC/kg of fresh liver.
  - 15 000 μg of dinitrocarbanilide (DNC)/kg of fresh liver.
  - 4 000 μg of DNC/kg for fresh muscle and fresh skin/fat.
### Analytical methods (*)

For the determination of narasin: reversed-phase high performance liquid chromatography (HPLC) using post-column derivatisation with vanillin and detection at 520 nm - ISO 14183:2005.

For determination of nicarbazin: high performance liquid chromatography method and ultraviolet detection (HPLC-UV) spectrometry (LC-MS/MS).

(*) Details of the analytical methods are available at the following address of the Community Reference Laboratory: www.irmm.jrc.be/crl-feed-additives
