<u>PARTICULARS TO APPEAR ON THE OUTER PACKAGE – CARDBOARD</u> CARTON

1. NAME OF THE VETERINARY MEDICINAL PRODUCT

Granofen Wormer 222.2mg Granules for Dogs and Cats

2. STATEMENT OF ACTIVE AND OTHER SUBSTANCES

Fenbendazole 222.2mg

3. PHARMACEUTICAL FORM

Granules for oral administration

4. PACKAGE SIZE

Box of 180 x 1g sachets

5. TARGET SPECIES

Dogs and cats

6. INDICATION(S)

Granofen Wormer 222.2mg Granules for Dogs and Cats is a broad spectrum anthelmintic for the treatment of domestic dogs and cats infected with immature and mature stages of nematodes of the gastro-intestinal and respiratory tracts. Granofen also has an ovicidal effect on nematode eggs.

Adult dogs and cats: For the treatment of adult dogs and cats infected with gastrointestinal nematodes and cestodes: *Ascarid* spp, *Ancylostoma* spp, *Uncinaria* spp, *Trichuris* spp, and *Taenia* spp.

Puppies and kittens: For the treatment of weaned puppies and kittens infected with gastro-intestinal nematodes.

Pregnant bitches:For the treatment of pregnant bitches to reduce pre-natal infections with *Toxocara canis* and the transfer of *Toxocara canis* and *Ancylostoma caninum* to their pups *via* the milk.

Also for the treatment of lungworm nematodes of domestic dogs affected with *Oslerus (Filaroides) osleri*, and domestic cats affected with *Aelurostrongylus abstrusus*.

7. METHOD AND ROUTE(S) OF ADMINISTRATION

Routine treatment of adult dogs and cats: administer a sachet of 1g Granofen Wormer 222.2mg Granules for Dogs and Cats per 2.2kg (5lbs) bodyweight as a single dose (equivalent to 100mg fenbendazole/kg bodyweight)

Practical Dosage Recommendations:

2.2 to 4.4 kg (5-10 lbs) 2 grams

4.4 to 8.8 kg (10-20 lbs) 4 grams

8.8 to 13.2 kg (20-30 lbs) 6 grams

13.3 to 22 kg (30-50 lbs) 10 grams

22.1 to 35.2 kg (50-80 lbs) 16 grams

35.3 to 50 kg (80-110 lbs) 22 grams

For dogs weighing over 50 kg (110 lbs), an extra 1g is required for each additional 2.2 kg of bodyweight.

The dose should be administered by mixing into the feed. Treatment should be repeated when natural reinfection with parasitic worms occurs.

Routine treatment of adult animals with minimal exposure to infection is advisable 2 to 4 times per year. More frequent treatment, at 6 to 8 weekly intervals is advisable for dogs in kennels.

Increased dosing for specific infections:

For the control of lungworm *Oslerus (Filaroides) osleri* in dogs administer a sachet of 1g Granofen Wormer 222.2mg Granules for Dogs and Cats per

4.4 kg (10 lbs) bodyweight daily for 7 consecutive days, (= 50 mg fenbendazole/kg bodyweight daily for 7 days). A repeat course of treatment may be required in some cases.

For the control of lungworm *Aelurostrongylus abstrusus* in cats administer 0.4g Granofen Wormer 222.2mg Granules for Dogs and Cats per 4.4kg (10lbs) bodyweight daily for 5 consecutive days, (=20 mg fenbendazole/kg bodyweight daily for 5 days).

For the treatment of clinical worm infestations in adult dogs and cats administer a sachet of 1g Granofen Wormer 222.2mg Granules for Dogs and Cats per 4.4 kg (10 lbs) bodyweight daily for 3 consecutive days, (=50 mg fenbendazole/kg bodyweight daily for 3 days).

Pregnant bitches:

Administer a sachet of 1g Granofen Wormer 222.2mg Granules for Dogs and Cats per 8.8 kg (20 lbs) bodyweight daily from day 40 of pregnancy continuously to 2 days post weaning (approximately 25 days) (= 25 mg fenbendazole/kg bodyweight daily).

Practical dosage recommendations:

Bodyweight	Daily dose for approx. 25 days
8.8 kg (20 lbs)	1 gram
17.6 kg (40 lbs)	2 grams
26.4 kg (60 lbs)	3 grams
35.2 kg (80 lbs)	4 grams
45 kg (100 lbs)	5 grams

For bitches weighing over 45 kg, an extra 1g is required daily for each additional 8.8 kg (20lbs) bodyweight.

Weaned puppies and kittens under six months of age:

Administer a sachet of 1g Granofen Wormer 222.2mg Granules for Dogs and Cats per 4.4 kg (10 lbs) bodyweight daily for 3 consecutive days mixed into the feed (= 50 mg fenbendazole/kg bodyweight daily for 3 days)

For dogs/puppies weighing over 22 kg (50 lbs), an extra 1 gram is required daily for each additional 4.4 kg (10 lbs) bodyweight. Puppies should be treated at 2 weeks of age, 5 weeks of age and again before leaving the breeder's premises. Treatment may also be required at 8 and 12 weeks of age. Thereafter frequency can be reduced unless the pups remain in kennels where reinfestation occurs more readily.

Practical dosage recommendations:

Bodyweight	Daily dose for 3 days
2.2 to 4.4 kg (5-10 lbs)	1 gram
4.4 to 8.8 kg (10-20 lbs)	2 grams
8.8 to 13.2 kg (20-30 lbs)	3 grams
13.2 to 22 kg (30-50 lbs)	5 grams

8. WITHDRAWAL PERIOD

N/A

9. SPECIAL WARNING(S), IF NECESSARY

Operator warnings: Direct contact with the skin should be kept to a minimum. Avoid inhalation of dust. Wash hands after use.

For animal treatment only.

Keep out of the reach and sight of children

Assess bodyweight as accurately as possible before calculating the dosage. Keep sachet in outer carton. Add to feed immediately before administration. Discard any remaining medicated feed.

10. EXPIRY DATE

11. SPECIAL STORAGE CONDITIONS

Store in a dry place.

12. SPECIFIC PRECAUTIONS FOR THE DISPOSAL OF UNUSED PRODUCTS OR WASTE MATERIALS, IF ANY

Environmental warnings: Dispose of used containers and sachets safely. Any unused veterinary medicinal product or waste materials derived from such veterinary medicinal products should be disposed of in accordance with local requirements.
