

**PARTICULARS TO APPEAR ON THE OUTER PACKAGE**

**NATURE/TYPE: Cardboard Box, 2 tablet pack**

**1. NAME OF THE VETERINARY MEDICINAL PRODUCT**

Beaphar One Dose Wormer for dogs 500mg film-coated tablets

**2. STATEMENT OF ACTIVE SUBSTANCES**

Each tablet contains nitroscanate 500 mg.

**3. PHARMACEUTICAL FORM**

Tablet

**4. PACKAGE SIZE**

Cont.: 2 tablets

**5. TARGET SPECIES**

For Medium Dogs (6-20kg)

**6. INDICATION(S)**

For the routine control of common roundworms and tapeworms in dogs.  
Roundworm, tapeworm. Vet strength.

**7. METHOD AND ROUTE(S) OF ADMINISTRATION**

One day treatment. This pack contains two foil-wrapped tablets, giving up to 2 single treatments. Sufficient to treat dogs up to 20 kg (44 lbs) bodyweight.

**DOSING INSTRUCTIONS:** It is important to follow the instructions carefully. For routine treatment of dogs, give one tablet per 10 kg (22 lbs) bodyweight. The following table provides a dose guide:

	<b>kgs</b>	<b>lbs</b>	<b>No. Tablets Required</b>
<b>Dog's Weight</b>	6.1 – 10	13.2 - 22	One
	10.1 – 20	22.1 – 44	Two
	20.1 - 30	44.1 – 66	Three
	30.1 - 40	66.1 - 88	Four

For dogs weighing more than 20 kg (44 lbs), a larger pack size is available. For dogs weighing less than 6.1 kg (13.2 lbs), use Beaphar One Dose Wormer for Small Dogs and Puppies.

**ADMINISTRATION:** Tablets should be given whole with about one fifth of the daily food ration in the morning when the dog's stomach is empty. The remaining food should be given in the evening.

**FURTHER INFORMATION:** It is recommended that adult dogs should be wormed routinely 4 times a year (every 3 months). The most common tapeworm of the dog is transmitted by the flea and attention to flea control is important in reducing the incidence of tapeworm in your pet. It is important to worm young puppies very regularly for roundworm at 2-weekly intervals from the age of 2 weeks to 8 weeks. Worming should then be carried out at 12, 16 & 24 weeks of age. Thereafter, the adult worming regime of 4 times a year is recommended. Nursing bitches should be treated at the same time and as frequently as puppies up to 12 weeks of age.

#### **8. WITHDRAWAL PERIOD(S)**

#### **9. SPECIAL WARNING(S), IF NECESSARY**

##### **CONTRA-INDICATIONS, WARNINGS ETC.**

Beaphar One Dose Wormer tablets for Dogs are film coated and should not be broken or divided. If you are unsure about dosing your pet, consult your Veterinary Surgeon. When administered as recommended, tablets are unlikely to cause vomiting. However, do not repeat if vomiting occurs shortly after dosing. If signs of disease persist or appear, consult a Veterinary Surgeon.
