

PARTICULARS TO APPEAR ON <THE IMMEDIATE PACKAGE>

{Carton}

1. NAME OF THE VETERINARY MEDICINAL PRODUCT

Beaphar Easy One Dose Wormer for Medium and Large Dogs, 500 mg Film-Coated Tablets

2. STATEMENT OF ACTIVE AND OTHER SUBSTANCES

Each tablet contains 500mg of Nitroscanate.

3. PHARMACEUTICAL FORM

Film-coated Tablets

4. PACKAGE SIZE

2 x 500 mg film-coated tablets.

5. TARGET SPECIES

Dogs

6. INDICATION(S)

[Optional. In case of space restriction and if the indication is clear from the name of the product, the indication should not be repeated]

For the control of Roundworm, Tapeworms and Hookworm.

7. METHOD AND ROUTE(S) OF ADMINISTRATION

How do I use it? Weigh your pet carefully and calculate the number of tablets needed. Give the tablet(s) in the morning, when your dog's stomach is empty, with about a fifth of your dog's daily food. Do not feed again until eight hours later. The tablets are film coated and must be fed whole, not broken or divided. Treat dogs separately and make sure only the dog to be treated has access to the food.

Adult Dogs (over 24 weeks) treat every 3-6 months. Fleas transmit the most common Tapeworm, so to reduce Tapeworm infection effective flea control is required.

Puppies (up to 24 weeks) and **small dogs** less than 8 kg (17.5 lb): use Beaphar Easy One Dose Wormer for Medium and Large Dogs, 500 mg Film-Coated Tablets.

Dosing Instructions

Give one tablet for each 10kg (11lb) of bodyweight.

8 kg (17.5 lb) – 10kg (22lb) one tablet.

10.1kg (22lb 4oz) – 20kg (44lb) two tablets.

For dogs weighing over 20kg (44lb), give one additional tablet for every 10kg (22lb) in weight.

If symptoms of disease persist or appear consult your Veterinary Surgeon.

8. WITHDRAWAL PERIOD

N/A

9. SPECIAL WARNING(S), IF NECESSARY

<User Warnings>

Contra-indications

Do not repeat treatment if vomiting occurs shortly after dosing.

Do not administer if your pet is sick or recovering from an illness.

Do not use in known cases of hypersensitivity to the active substance or to any of the excipients. If a hypersensitivity reaction occurs, treatment should be discontinued.

Precautions

For animal treatment only. Keep out of reach of children. This product can be an irritant to the skin and eyes. Tablets are film-coated and should not be broken or divided. Wash hands after use.

The product should not be administered to puppies less than 12 weeks old, owing to the need to restrict food intake at the time of administration.

For more information see enclosed leaflet.

10. EXPIRY DATE

EXP end: {month/year}

11. SPECIAL STORAGE CONDITIONS

Store in a dry place. Do not store above 25°C.

12. SPECIFIC PRECAUTIONS FOR THE DISPOSAL OF UNUSED PRODUCTS OR WASTE MATERIALS, IF ANY

Dispose of empty packaging and any remaining tablets in the household refuse.

2. NAME OF THE VETERINARY MEDICINAL PRODUCT

Beaphar Easy One Dose Wormer for Medium and Large Dogs, 500 mg Film-Coated Tablets

3. STATEMENT OF THE ACTIVE SUBSTANCE (S) AND OTHER INGREDIENTS

Each tablet contains Nitroscanate 500mg.

4. INDICATION(S)

For the treatment of the following nematodes (roundworms) and cestodes (tapeworms): Nematodes: *Toxocara canis*, *Toxascaris leonina*, *Uncinaria stenocephala*, *Ancylostoma caninum*. Cestodes: *Taenia hydatigena*, *Taenia pisiformis* and *Dipylidium caninum*.

5. CONTRAINDICATIONS

Do not repeat treatment if vomiting occurs shortly after dosing.
Do not administer if your pet is sick or recovering from an illness.
Do not use in known cases of hypersensitivity to the active substance or to any of the excipients. If a hypersensitivity reaction occurs, treatment should be discontinued.

6. ADVERSE REACTIONS

During the post-marketing surveillance, transient gastrointestinal signs (vomiting and diarrhoea); systemic sign (lethargy) and neurological sign (ataxia) have been observed very rarely.

The frequency of adverse reactions is defined using the following convention:

- very common (more than 1 in 10 animals treated displaying adverse reaction(s))
- common (more than 1 but less than 10 animals in 100 animals treated)
- uncommon (more than 1 but less than 10 animals in 1,000 animals treated)
- rare (more than 1 but less than 10 animals in 10,000 animals treated)
- very rare (less than 1 animal in 10,000 animals treated, including isolated reports).

7. TARGET SPECIES

Dogs

8. DOSAGE FOR EACH SPECIES, ROUTE(S) AND METHOD OF ADMINISTRATION

Dosing Instructions

The dose of Beaphar Easy One Dose Wormer for Medium and Large Dogs, 500 mg for the routine treatment of adult dogs is 1 x 500mg tablet per 10kg (22lb) of bodyweight. Repeat this treatment every 3 to 6 months as a preventative measure.

Follow the dosage chart below:

Dog's weight	Example breed	Number of tablets
8 kg (17.5 lb)– 10kg (22lb)	West Highland Terrier	One
10.1kg (22lb 4oz) – 20kg (44lb)	Springer Spaniel	Two

For dogs weighing more than 20kg (44lb), give one additional tablet for every extra 10kg (22lb) in weight. For smaller dogs weighing less than 8 kg (17.5 lb) use Beaphar Easy One Dose Wormer for Medium and Large Dogs, 500 mg Film-Coated Tablets.

How Do I Use It? Give the required number of tablets first thing in the morning when your dog's stomach is empty, with about one fifth of his daily food ration. The tablet(s) should be given whole. Tablets are film-coated and should not be broken or divided. To reduce the risk of vomiting, it is recommended that the remaining food ration is withheld for 8 hours afterwards.

9. ADVICE ON CORRECT ADMINISTRATION

Beaphar Easy One Dose Wormer for Medium and Large Dogs, 500 mg will kill Tapeworms, Roundworms and Hookworms. It is advisable to worm adult dogs every 3 to 6 months as a preventative measure. If signs of disease persist or appear, consult your Veterinary Surgeon. There is no permanent treatment for these worms, therefore routine worming is essential, especially if the animal is suffering from a flea

infestation. Worms are very common parasites that can cause irritation and suffering and could hinder development or lead to serious illness. Symptoms vary, but can include traces of blood or worms in the faeces, ravenous appetite without a corresponding increase in weight, attempts at vomiting and a marked deterioration in coat condition and breath.

Further Information:

It is recommended that adult dogs should be wormed routinely 2 – 4 times a year. Since the most common tapeworm of the dog (*Dipylidium Caninum*) is transmitted by a flea and has a very short pre-patent period, it is important to pay attention to flea control to reduce the incidence of tapeworm in your pet.

Nursing bitches should be treated at 2, 4, 6, 8 and 12 weeks after whelping. Thereafter the adult worming regime of 2 - 4 times a year is recommended.

If symptoms of disease persist or appear, consult your veterinary surgeon.
