PACKAGE LEAFLET FOR: QUANTEX 50 mg TABLETS

1. NAME AND ADDRESS OF THE MARKETING AUTHORISATION HOLDER AND OF THE MANUFACTURING AUTHORISATION HOLDER RESPONSIBLE FOR BATCH RELEASE, IF DIFFERENT

Marketing Authorisation Holder:

Vetoquinol UK Limited
Steadings Barn
Pury Hill Business Park
Nr. Alderton
Towcester
Northamptonshire
NN12 7LS

Manufacturer responsible for batch release:

- KVP Pharma und Veterinär Produkte GmbH, Projensdorfer Str. 324, D-24106 Kiel, Germany
- Vetoquinol S.A., Magny-Vernois, 70200 Lure, France

2. NAME OF THE VETERINARY MEDICINAL PRODUCT

Quantex 50 mg Tablets
Praziquantel

3. STATEMENT OF THE ACTIVE SUBSTANCE (S) AND OTHER INGREDIENTS

Each white tablet contains 50 mg praziquantel as active substance.

4. INDICATION(S)

Tapewormer.
Tablets for the treatment of tapeworms in cats and dogs.

Uses

For the treatment of adult tapeworms in cats and dogs. The product is effective against both immature and mature forms of adult tapeworms in both cats and dogs.

The product is a highly effective treatment against all the common species of tapeworm infecting cats and dogs in the United Kingdom including *Echinococcus granulosus*, *Taenia ovis*, *Taenia pisiformis*, *Taenia multiceps*, *Taenia hydatigena*, *Taenia taeniaeformis*, and *Dipylidium caninum*. The product is also effective against *Echinococcus multilocularis* (see section 15).

5. CONTRAINDICATIONS

Do not administer to dogs weighing less than 2.5 kg.

Do not administer to unweaned kittens and puppies as such animals are rarely infected with tapeworms.

Do not use in animals known to be allergic to the active substance (praziquantel).

6. ADVERSE REACTIONS

None known.

If you notice any serious effects or other effects not mentioned in this package leaflet, please inform your veterinary surgeon.

7. TARGET SPECIES

Cats and dogs.

8. DOSAGE FOR EACH SPECIES, ROUTE(S) AND METHOD OF ADMINISTRATION

5 mg/kg bodyweight (1 tablet per 10 kg body weight).

Dogs	2.5 – 5.0 kg	½ tablet
	6.0 – 10.0 kg	1 tablet
	11.0 – 20.0 kg	2 tablets
	21.0 – 30.0 kg	3 tablets
	Over 30 kg	<i>pro rata</i>
Cats	Adult	½ tablet

9. ADVICE ON CORRECT ADMINISTRATION

The product should be given by mouth, preferably by opening the animal's mouth and pushing the tablet over the back of the tongue so that it cannot be rejected.

Alternatively, a tablet can be wrapped in a piece of meat or butter and offered to the animal or crushed and mixed with the food.

A single dose is all that is required. However, for dogs in rural areas and for packs of hounds, this dose should be repeated every four weeks to ensure that newly acquired tapeworms are destroyed before reaching maturity. Dosing must be associated with strict control of the dog's diet to ensure that uncooked offal is not eaten.

10. WITHDRAWAL PERIOD(S)

Not applicable.

11. SPECIAL STORAGE PRECAUTIONS

Keep out of the sight and reach of children.

Do not store above 25 C. Store in a dry place.

Keep the blister in outer carton.

Any part-used tablets should be discarded.

Do not use after the expiry date stated on the outer carton under "EXP". The expiry date refers to the last day of that month.

12. SPECIAL WARNING(S)

For animal treatment only.

In the interests of good hygiene, persons administering the tablets directly to an animal or adding them to the animal's food should wash their hands afterwards.

13. SPECIAL PRECAUTIONS FOR THE DISPOSAL OF UNUSED PRODUCT OR WASTE MATERIALS, IF ANY

Dispose of any empty packaging and any remaining product in the household refuse.

14. PID LINK (Do not print heading)

[The following statement must be included where reference to the European Union Product Database is included on the product information. This statement is relevant to both UK(GB) and UK(NI) products:]

Find more product information by searching for the 'Product Information Database' on www.gov.uk.

15. OTHER INFORMATION

Fleas serve as intermediate hosts for one common type of tapeworm – *Dipylidium caninum*. To avoid reinfection with this parasite, flea control of the animal and its housing should be carried out at the same time. Unless flea control is complete, an infected flea population may survive and retreatment of the animal may be necessary.

Since it contains praziquantel, the product is effective against *Echinococcus multilocularis*, which does not occur in the UK but is becoming more common in some European countries. As a precautionary measure to prevent establishment of *E multilocularis* in the UK it is recommended that all cats and dogs entering the country be treated with praziquantel.
