PARTICULARS TO APPEAR ON <THE IMMEDIATE PACKAGE>

{BLISTER CARD}

1. NAME OF THE VETERINARY MEDICINAL PRODUCT

Armitage Pet Care Felt Flea Collar, 18% w/w

2. STATEMENT OF ACTIVE AND OTHER SUBSTANCES

Contains Permethrin (Cis:Trans 40:60)

What is in this collar?
Each collar contains 456mg (18% w/w) of Permethrin technical (Cis:Trans 40:60) which is a Pyrethroid.

3. PHARMACEUTICAL FORM

Collar

4. PACKAGE SIZE

1 collar

5. TARGET SPECIES

Cats

6. INDICATION(S)

[Optional. In case of space restriction and if the indication is clear from the name of the product, the indication should not be repeated]

What does this collar do?
Armitage Pet Care Felt Flea Collar contains an insecticide that kills fleas on your cat and prevents their return for up to 4 months. However, as fleas can also live in your carpets and in your cat's bed, you should treat these areas with a suitable insecticide and vacuum regularly.

7. METHOD AND ROUTE(S) OF ADMINISTRATION

How do I use this collar?
Do not remove the collar from the blister until ready for use. Fasten around your cat's neck (coloured side facing outwards), leaving enough room to insert 2 fingers between the collar and neck – remember to loosen the collar if fitted on to a growing cat. Cut off any collar sticking out beyond the buckle. Wrap this cut-off in a bag and

throw it in your dustbin. Keep the empty blister card for reference until the collar is thrown away.

For external use only.

8. WITHDRAWAL PERIOD

N/A

9. SPECIAL WARNING(S), IF NECESSARY

<User Warnings>

Is this collar safe for my cat?
Yes. However, you should not use it if your cat is less than 12 weeks old, if your cat is sick or getting over an illness. Do not allow the collar to come into contact with pregnant or nursing queens. In all of these cases, use a flea comb or speak to your vet.

What precautions should I take to protect my cat?
For external use only. Do not use any other flea control products on your cat whilst using this collar or within 7 days of removing it. Leave room between the collar and your cat's neck to allow for growth and to prevent irritation – if skin irritation does occur, remove the collar straight away.
Never allow any animal to chew the collar. If signs of disease persist or appear consult your Veterinary Surgeon.

What precautions should I take to protect myself and my family?
Wash hands thoroughly with soap and water after handling the collar. Do not smoke, eat or drink while handling the collar. Do not allow children to play with the collar or to chew and suck on it.
A pet wearing a flea collar should not sleep in bed with people, particularly children.

10. EXPIRY DATE

EXP: end {month/year}

11. SPECIAL STORAGE CONDITIONS

Do not store above 25 °C

Do not remove the collar from the blister until ready for use.

12. SPECIFIC PRECAUTIONS FOR THE DISPOSAL OF UNUSED PRODUCTS OR WASTE MATERIALS, IF ANY

EXTREMELY DANGEROUS to fish and aquatic life. Do not contaminate ponds or other watercourses with the collar. Dispose of excess collar length, the used collar and empty packaging in the household refuse.

<When the container is broached/opened for the first time, using the in-use shelf-life which is specified on this package leaflet, the date on which any product remaining in the container should be discarded should be determined. This discard date should be written in the space provided.>

12. SPECIAL WARNING(S)

<User Warnings>

For Animal Treatment Only

[Immunologicals ONLY - *For injectables containing mineral oil, the following statement should be included:]*

<To the user:

This product contains mineral oil. Accidental injection/self injection may result in severe pain and swelling, particularly if injected into a joint or finger, and in rare cases could result in the loss of the affected finger if prompt medical attention is not given.

If you are accidentally injected with this product, seek prompt medical advice even if only a very small amount is injected and take the package insert with you.

If pain persists for more than 12 hours after medical examination, seek medical advice again.

To the physician:

This product contains mineral oil. Even if small amounts have been injected, accidental injection with this product can cause intense swelling, which may, for example, result in ischaemic necrosis and even the loss of a digit. Expert, PROMPT, surgical attention is required and may necessitate early incision and irrigation of the injected area, especially where there is involvement of finger pulp or tendon.>

13. SPECIAL PRECAUTIONS FOR THE DISPOSAL OF UNUSED PRODUCT OR WASTE MATERIALS, IF ANY

Any unused veterinary medicinal product or waste materials derived from such veterinary medicinal products should be disposed of in accordance with local requirements.
