PARTICULARS TO APPEAR ON THE OUTER PACKAGE

Cardboard box

1. NAME OF THE VETERINARY MEDICINAL PRODUCT

Efex 10 mg chewable tablets for cats and dogs

Marbofloxacin

2. STATEMENT OF ACTIVE SUBSTANCES

One tablet contains:

Marbofloxacin......10.0 mg

3. PHARMACEUTICAL FORM

Chewable tablet

4. PACKAGE SIZE

10 tablets 120 tablets 240 tablets

5. TARGET SPECIES

Cats and Dogs

6. INDICATION(S)

7. METHOD AND ROUTE(S) OF ADMINISTRATION

For oral administration.

Read the package leaflet before use.

8. WITHDRAWAL PERIOD(S)

9. SPECIAL WARNING(S), IF NECESSARY

Read the package leaflet before use.

10. EXPIRY DATE

EXP {month/year}
Any tablet portions remaining after 72 hours should be discarded

11. SPECIAL STORAGE CONDITIONS

Blister: PVC-TE-PVDC – aluminium heat sealed: Do not store above 30°C

Blister: PA-AL-PVC – aluminium heat sealed

Tablet portions should be stored in the blister pack Keep the blister in the outer carton.

12. SPECIAL PRECAUTIONS FOR THE DISPOSAL OF UNUSED PRODUCTS OR WASTE MATERIALS, IF ANY

Dispose of waste material in accordance with local requirements.

13. THE WORDS "FOR ANIMAL TREATMENT ONLY" AND CONDITIONS OR RESTRICTIONS REGARDING SUPPLY AND USE, if applicable

For animal treatment only - to be supplied only on veterinary prescription

14. THE WORDS "KEEP OUT OF THE SIGHT AND REACH OF CHILDREN"

Keep out of the sight and reach of children.

15. NAME AND ADDRESS OF THE MARKETING AUTHORISATION HOLDER

Ceva Animal Health Ltd Explorer House Mercury Park Wycombe Lane Wooburn Green High Wycombe Buckinghamshire HP10 0HH United Kingdom

PACKAGE LEAFLET

Efex 10 mg chewable tablets for cats and dogs

1. NAME AND ADDRESS OF THE MARKETING AUTHORISATION HOLDER AND OF THE MANUFACTURING AUTHORISATION HOLDER RESPONSIBLE FOR BATCH RELEASE, IF DIFFERENT

Marketing authorisation holder

Ceva Animal Health Ltd Explorer House Mercury Park Wycombe Lane Wooburn Green High Wycombe Buckinghamshire HP10 0HH United Kingdom

Manufacturer responsible for batch release:

Ceva Santé Animale Boulevard de la Communication Zone Autoroutière 53950 LOUVERNE FRANCE

2. NAME OF THE VETERINARY MEDICINAL PRODUCT

Efex 10 mg chewable tablets for cats and dogs

Marbofloxacin

3. STATEMENT OF THE ACTIVE SUBSTANCE(S) AND OTHER INGREDIENT(S)

One tablet contains:	
Active substance:	
Marbofloxacin	10.0 mg
Chewable tablet	•
Oblong scored beige tablet. The	tablet can be divided in two equal parts.

4. INDICATION(S)

In cats

Marbofloxacin is indicated in the treatment of:

- skin and soft tissue infections (wounds, abscesses, phlegmons) caused by susceptible strains of organisms.
- upper respiratory tract infections caused susceptible strains of organisms.

In dogs

Marbofloxacin is indicated in the treatment of:

- skin and soft tissue infections (skinfold pyoderma, impetigo, folliculitis, furunculosis, cellulitis) caused by susceptible strains of organisms.
- urinary tract infections (UTI) caused by susceptible strains of organisms associated or not with prostatitis or epididymitis.
- respiratory tract infections caused by susceptible strains of organisms.

5. CONTRAINDICATIONS

Do not use in dogs aged less than 12 months, or less than 18 months for giant breeds of dogs with a longer growth period. Do not use in cats aged less than 16 weeks.

Do not use in cases of hypersensitivity to the active substance, other (fluoro)quinolones or any of the excipients.

6. ADVERSE REACTIONS

Mild side effects that do not necessitate cessation of treatment such as vomiting, softening of faeces, modification of thirst or transient increase in activity may very rarely occur. These signs cease spontaneously after treatment.

The frequency of adverse reactions is defined using the following convention:

- very common (more than 1 in 10 animals treated displaying adverse reaction(s))
- common (more than 1 but less than 10 animals in 100 animals treated)
- uncommon (more than 1 but less than 10 animals in 1,000 animals treated)
- rare (more than 1 but less than 10 animals in 10,000 animals treated)
- very rare (less than 1 animal in 10,000 animals treated, including isolated reports).

If you notice any side effects, even those not already listed in this package leaflet or you think that the medicine has not worked, please inform your veterinary surgeon.

Alternatively you can report via your national reporting system {national system details}".

7. TARGET SPECIES

Cats and Dogs

8. DOSAGE FOR EACH SPECIES, ROUTE(S) AND METHOD OF ADMINISTRATION

For oral administration

The recommended dose rate is 2 mg/kg/d (1 tablet for 5 kg per day) in single daily administration.

Cats:

- for skin and soft tissue infections (wounds, abscesses, phlegmons) treatment duration is 3 to 5 days.
- for upper respiratory infections treatment duration is 5 days. Dogs:
- in skin and soft tissue infections, treatment duration is at least 5 days. Depending on the course of the disease, it may be extended up to 40 days.
- in urinary tract infections, treatment duration is at least 10 days. Depending on the course of the disease, it may be extended up to 28 days.
- in respiratory infections, treatment duration is at least 7 days and depending on the course of the disease, it may be extended up to 21 days.

To ensure a correct dosage body weight should be determined as accurately as possible to avoid underdosing.

9. ADVICE ON CORRECT ADMINISTRATION

The chewable tablets may be accepted by cats and dogs or can be administered directly into the mouth of the animals.

10. WITHDRAWAL PERIOD(S)

Not applicable

11. SPECIAL STORAGE PRECAUTIONS

Keep out of the sight and reach of children.

Blister: Polyvinyl chloride-Thermo-elast-Polyvinylidene chloride – aluminium heat

sealed: Do not store above 30°C

Blister: Polyamide-Aluminium-Polyvinyl chloride – aluminium heat sealed: This veterinary medicinal product does not require any special temperature storage conditions

Tablet portions should be stored in the blister pack

Any tablet portions remaining after 72 hours should be discarded

Keep the blister in the outer carton.

Do not use after the expiry date which is stated on the carton and blister after "EXP".

12. SPECIAL WARNING(S)

A low urinary pH could have an inhibitory effect on the activity of marbofloxacin.

Special precautions for use in animals

The chewable tablets are flavoured. In order to avoid any accidental ingestion, store tablets out of reach of the animals.

The fluoroquinolones have been shown to induce erosion of articular cartilage in juvenile dogs and care should be taken to dose accurately especially in young animals.

The fluoroquinolones are also known for their potential neurological side effects. Cautious use is recommended in dogs and cats diagnosed as suffering from epilepsy.

Fluoroquinolones should be reserved for the treatment of clinical conditions which have responded poorly, or are expected to respond poorly to other classes of antimicrobials. Whenever possible, use of fluoroquinolones should be based on susceptibility testing. Use of the product deviating from the instructions given in the SPC may increase the prevalence of bacteria resistant to the fluoroquinolones and may decrease effectiveness of treatment with other quinolones due to the potential for cross-resistance.

Official and local antimicrobial policies should be taken into account when the product is used.

Special precautions to be taken by the person administering the veterinary medicinal product to animals

People with known hypersensitivity to fluoroquinolones or other components of the formulation should avoid contact with the veterinary medicinal product. In case of accidental ingestion seek medical advice immediately and show the package leaflet or the label to the physician. Wash hands after use.

Pregnancy and lactation

Studies in laboratory animals (rat, rabbit) showed no teratogenicity, embryotoxicityand maternotoxicity with marbofloxacin at therapeutic doses.

The safety of marbofloxacin has not been assessed in pregnant and lactating cats and dogs. Use only according to the benefit/risk assessment by the responsible veterinarian in pregnant and lactating animals.

Interaction with other medicinal products and other forms of interaction

Fluoroquinolones are known to interact with orally administered cations (Aluminium, Calcium, Magnesium, Iron). In such cases, the bioavailability may be reduced. Serum levels of theophylline should be carefully monitored when theophylline and marbofloxacin are used concomitantly, as fluoroquinolones may increase serum levels of theophylline.

Overdose (symptoms, emergency procedures, antidotes)

Overdosage may cause acute signs in the form of neurological disorders, which should be treated symptomatically.

13. SPECIAL PRECAUTIONS FOR THE DISPOSAL OF UNUSED PRODUCT OR WASTE MATERIALS, IF ANY

Any unused veterinary medicinal product or waste materials derived from such veterinary medicinal products should be disposed of in accordance with local requirements

14. DATE ON WHICH THE PACKAGE LEAFLET WAS LAST APPROVED

September 2022
