Product Information

An iodophor-based teat dip and teat spray which has been specially formulated to help reduce the bacterial contamination that causes mastitis in dairy herds. Reduced the risk of infection by leaving an antiseptic film of iodine adhering to the teats which have treated by dipping or spraying. Contains 2% w/v glycerol and 18% w/v sorbitol (0.5% w/v glycerol and 4.5% w/v sorbitol when diluted) to help keep teats soft and supple, and to aid in the prevention and healing of sores and cracks.

Directions for use

TEAT DIPPING: Fill teat dip cup about two-thirds full with the prepared solution. Dip teats of every cow immediately after each has been milked, making sure that the full length of the teat is immersed. Top up with fresh solution as required. Empty and wash out cups after milking.

TEAT SPRAYING Immediately after milking, spray entire surface of each teat of every cow with prepared solution.

Dilute 1: 500. To help prevent cross infection, individual cloths or disposable paper towels are strongly recommended.

Dry teats before milking. Immerse clusters and agitate for at least half a minute. Rinse in clean water before use. Wash and dry udders and teats before milking.
