2. NAME OF THE VETERINARY MEDICINAL PRODUCT
KENOSTART SPRAY AND DIP 3 mg/g Teat Dip or Spray Solution for cattle (dairy)

3. STATEMENT OF THE ACTIVE SUBSTANCE AND OTHER INGREDIENT

Available Iodine, 3 mg/g

4. INDICATION

Teat disinfection as part of a prevention strategy for mastitis in cattle.

5. CONTRAINDICATIONS

Do not use in case of hypersensitivity to the active substance or to any of the exipients.

6. ADVERSE REACTIONS

Inform your veterinary surgeon if adverse reactions occur using the veterinary medicinal product.
Repeated exposure to iodine can lead to iodine allergy. Allergic reactions to iodine may become apparent as allergic skin reaction but also as anaphylactic shock in rare cases.

7. TARGET SPECIES

Cattle (dairy).

8. DOSAGE FOR EACH SPECIES, ROUTE(S) AND METHOD OF ADMINISTRATION

The product is suitable for dipping or spraying immediately after each milking. The veterinary medicinal product is supplied ready to use a teat dip or spray. If a dip cup is used, it should hold at least 5ml of veterinary medicinal product. Dip the teats immediately after milking each cow. Ensure that the teat is completely covered to three quarters of its length.

English

For the teat spraying, spray the entire surface of each teat with the veterinary medicinal product immediately after milking. The dip cup or sprayer should be replenished as necessary. The dip cup or sprayer should be emptied after milking and washed before reused. The product is meant to be used as a post-milking teat dip or spray up to two times per day.

9. WITHDRAWAL PERIOD

Meat & offal: zero days
Milk: zero days

10. SPECIAL STORAGE PRECAUTIONS

Keep out of the reach and sight of the children
Store in the original container
Keep the container tightly closed
Protect from frost
If the veterinary medicinal product has frozen, thaw in a warm place and shake well before use
Protect from light
Do not use after the expiry date stated on the label
Shelf life after first opening the immediate packaging: 6 months

11. SPECIAL WARNING(S)

Ensure udder and teats are clean and dry before the next milking.
Can be used during pregnancy and lactation.
In absence of compatibility studies, this veterinary medicinal product must not be mixed with other veterinary medicinal products.
This veterinary medicinal product is for topical application, significant absorption does not occur.

Special precautions for use in animals

- For animal treatment only
- For external use only
- Use for the treatment of teats with cutaneous lesions may delay wound-healing. It is recommended to discontinue the treatment until lesions are healed.

Operator Warnings

- Avoid contact with eyes. If splashed in the eye, rinse with clean running water and seek medical advice.
- In case of ingestion, drink large quantities of water and seek medical attention immediately.
- Keep away from food and animal feed.
- Wash hands after use.
- When used as a spray, avoid working in the spray mist. Those who are hypersensitive to iodine should avoid using this product.

English

12. SPECIAL PRECAUTIONS FOR THE DISPOSAL OF UNUSED PRODUCT OR WASTE MATERIAL, IF ANY

Dispose of any unused product and empty containers in accordance with guidance from your local waste regulation authority.

UK only: To dispose of unused product to land, you must have an authorization under the Groundwater Regulations 1998.
