

SUMMARY OF PRODUCT CHARACTERISTICS

1. Name of the Veterinary Medicinal Product:

Johnson's Antiseptic Wound Powder 2% w/w, Cutaneous powder

2. Qualitative and Quantitative Composition:

Active Ingredient: Tosylchloramide Sodium 2% w/w

For full list of excipients, see section 6.1.

3. Pharmaceutical form:

Cutaneous powder.

A fine, white powder with odour characteristic of chloramine.

4. Clinical particulars:

4.1 Target species:

Dogs and Cats.

4.2 Indications for use, specifying the target species:

Antiseptic dry dressing for minor wounds and abrasions of dogs and cats.

4.3 Contra-Indications:

None known.

4.4 Special warnings for each target species:

Topical hypersensitivity reactions may occur; rare; severity: may manifest by reddening and scaling of affected skin, eczematous exacerbation of the lesion, or as a failure to heal.

Anaphylaxis may rarely occur, theoretically.

Prolonged use may result in delayed healing and/or overgrowth of non-susceptible organisms.

4.5 Special precautions for use:

i) Special precautions for use in animals:

For external use only.

If condition fails to improve within 7 days consult a veterinary surgeon.

ii) Special precautions to be taken by the person administering the medicinal product to animals:

Avoid contact with eyes. If contact with eyes occurs, wash with copious amounts of water.

Avoid inhaling powder. If ingested, seek medical advice immediately.

Wash hands after use.

4.6 Adverse reactions (frequency and seriousness)

None reported.

4.7 Use during pregnancy, lactation or lay:

No restrictions necessary.

4.8 Interaction with other medicinal products and other forms of interaction:

None reported.

4.9 Amounts to be administered and administration route:

As dusting powder to wounds and abrasions. Wounds should be thoroughly cleansed prior to application of the wound powder.

4.10 Overdose (symptoms, emergency procedures, antidotes) if necessary:

None stated.

4.11 Withdrawal periods:

Not applicable.

5. Pharmacological properties:

Pharmacotherapeutic group: Antiseptics and disinfectants, Other antiseptics and disinfectants

ATC Vet code: QD08AX04

5.1 Pharmacodynamic properties:

Antiseptic dry dressing.

Chloramine is an organic chlorine-releasing compound with general antiseptic properties of chlorine which is active against most bacteria and some other micro-organisms.

5.2 Pharmacokinetic particulars:

No other information available.

6. Pharmaceutical particulars:

6.1 List of excipients:

Maize Starch Sterilisable

6.2 Incompatibilities:

None known.

6.3 Shelf-life:

Shelf life of the veterinary medicinal product as packaged for sale: 2 years.

6.4 Special precautions for storage:

Do not store above 25°C.
Store in a dry place.
Store in tightly closed original container.

6.5 Nature and composition of immediate packaging:

Pack Size: 20g

Container: White opaque LDPE cylindrical bottle
Closure: White opaque polyethylene screw thread cap

6.6 Special precautions for the disposal of unused veterinary medicinal products or waste materials derived from the use of such products, if appropriate:

Any unused veterinary medicinal product or waste materials derived from such veterinary medicinal products should be disposed of in accordance with local requirements.
